DETAILED ACTION

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 8, and 15 recite "a driver layer having a file system layer including a virtual file system and an audio-only file system, wherein the virtual file system receives the predetermined command from the application layer, determines a corresponding control command for the audio-only file system, and outputs the corresponding control command to the audio-only file system which outputs the received corresponding control command." Thompson et al. (5,463,772) disclose that a virtual file system can convert commands from a file system into commands that another file system can understand in order to allow communication between the two file systems (**column 18, lines 20-38**). Thompson et al. as well as other prior art references generically disclose a virtual file system being used as a "bridge" between two file systems, but do not go into enough detail to render the claimed invention obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
